RE: Surface Commingling Allocation Percentage

Dear Frank:

Unocal would like to request the attached percentages on the approved blanket surface commingling order #PC-906 for the Rincon Unit #134E DK/MV dated March 27, 1995. The above well has been completed in the Blanco Mesa Verde/Basin Dakota formations. A 24 hour test was ran beginning on August 18, 1995 on the Dakota formation and on August 22, 1995 on the Mesa Verde formation.

Your urgency with this matter would be very much appreciated. Thank you.

Sincerely,
Union Oil Company of California dba Unocal

COMMINGLING ORDER PC-906

Unocal Oil & Gas Division
P.O. Box 850
Bloomfield, New Mexico 87413

Attention: Brett Liggett

The above-named company is hereby authorized to commingle Blanco Mesaverde and Basin Dakota Pool production from 14 wells described on Exhibit "A" attached hereto, in a common tank battery and to determine the production from each pool by semi-annual well tests. (If this method is to be authorized, all commingled production just be of marginal nature; further the operator shall notify the Santa Fe Office of the Division in the event any well in the commingled battery becomes capable of top allowable production, at which time the Division will amend this order or take such other action as may be appropriate.) Allocations factors for oil and gas production shall also be determined from such tests and adjusted accordingly.

FURTHER: The operator shall notify the Aztec District Office of the Division upon implementation of the commingling process.

NOTE: This installation shall be installed and operated in accordance with the applicable provisions of Rule 303 of the Division Rules and Regulations and the Division "Manual for the Installation and Operation of Commingling Facilities." It is the responsibility of the producer to notify the transporter of this commingling authority.

DONE at Santa Fe, New Mexico, on this 27th day of March, 1995.

WILLIAM J. LEMAY,
Director
