*Mona Lisa Well No. 1
API No. 30-039-25739
Unit P Section 14, Township 26 North, Range 7 West, NMPM,
Rio Arriba County, New Mexico.
Otero-Chacra (Gas - 82329) and
South Blanco-Pictured Cliffs (Gas - 72439) Pools*

Dear Mr. Roe:

Reference is made to your recent application for an exception to Rule 303.A. of the Division Rules and Regulations to permit the above described well to commingle production from the subject pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

Production from the subject well shall be allocated as follows:

POOL	OIL%	GAS %
South Blanco-Pictured Cliffs Gas Pool	NA	70%
Otero-Chacra Gas Pool	NA	30%

The allocation formula established herein should be amended by the applicant in the event the actual production encountered upon completion differs substantially from the forecast production.

REMARKS: The operator shall notify the Aztec District Office of the Division upon implementation of the commingling process.

Pursuant to Rule 303.H., the commingling authority granted herein may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Approved at Santa Fe, New Mexico on this 25th day of November, 1997.
