13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all starters and zones pertinent to this work.)

Operator request approval to complete the Gallup formation in this well. Approval has been granted to complete the Basin Dakota and Blanco Mesa Verde. Approval has also been granted to commingle these two zones in the wellbore. A review of the open hole and mud logs from this well reveal that the Gallup will also be commercial and should be completed.

The Gallup formation will be perforated from 5033-6002 with 44 total holes. The interval will be fractured with 100,000 lb. 20/40 sand.

An application has been filed with the New Mexico Oil Conservation Commission and The Bureau of Land Management for administrative approval to commingle the Gallup with the Dakota and Mesa Verde in the wellbore.

A C-102 for the Gallup is attached.

14. I hereby certify that the foregoing is true and correct.
