Re: Texaco Inc. #1 Navajo Tribal AO
660/N; 660/E, 33-25N-19W

Gentlemen:

Copies of Federal Notice of Intention to Drill for the above well were filed in this office on August 10, 1964. With the exception of two electric logs no further information has ever been filed with this office. We have learned that the well was plugged and abandoned sometime in September, 1964.

Your attention is directed to the New Mexico Oil Conservation Commission Rules and Regulations, Section M beginning on Page 53. You will note that these rules require that Form C-103 "Miscellaneous Reports" on wells must be filed within 10 days following the commencement of drilling operations. Further miscellaneous notices must be filed reporting the results of casing shut-off or other operations conducted on the well. Rule 1108 of Section M states that "Well Record Form, C-105, must be filed within 20 days after the completion of any well." As this well is located on Indian Land we presume that the drilling operation was conducted under the direction of the U.S.G.S. Office in Farmington. By arrangement with the U.S.G.S. the Oil Commission accepts copies of Federal forms corresponding to the Commission Form C-103 and C-105; however we do require that copies of these forms be submitted to this office within the time limit specified by our rules. In case the well is a tight hole the statutes provide that the information may be held for 90 days from the time of completion of the well. In the case of the above well the 90-day period has already expired. It is evident that your company is in violation of the rules of the Oil and Gas Conservation Commission in regard to the above well. We are, therefore,
