Subject: #1 Harold Begay
C NW SW Section 25-25N-11W
San Juan County, New Mexico

Attention: Mr. Emery C. Arnold

Dear Mr. Arnold:

We are enclosing herewith in quintuplicate Well Record (Form C-105) on the subject well. It is our understanding that all logs on this well were furnished to your office by our Exploration Department on January 10, 1957.

In accordance with your request dated January 11 and our subsequent conversation, also enclosed in duplicate are the following:

10/9/56 Well Location Plat
10/10/56 Designation of Operator
10/11/56 Letter of transmittal of Notice of Intention to Drill
10/11/56 Notice of Intention to Drill
10/15/56 Approval letter from U.S.G.S., with attached instructions
11/5/56 U.S.G.S. - Lessee's Monthly Report of Operations, Oct., 1956
12/4/56 U.S.G.S. - Lessee's Monthly Report of Operations, Nov., 1956

The above list includes everything which we have sent to and received from the U. S. Geological Survey on this well; and we trust the enclosed data will complete the records required by your office on this particular well.

Yours very truly,

KARL A. BASHARA
District Superintendent

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is planned to set approximately 175 ft. of 10-3/4" OD surface casing and circulate cement to surface. It is then planned to drill with conventional rotary tools and mud to an approximate total depth of 5300 ft. The Gallup sand will be cored, and drill stem tested if the core indicates commercial productivity. Electric and micrologs will then be run. If commercial oil shows are encountered 5-1/2" OD 14# J-55 seamless casing will be set through the pay section and cemented with 200 sacks of regular cement. Gamma Ray logs will be run and the well will be selectively perforated and sand-oil fraced for completion.

If the well is a dry hole, it will be plugged in accordance with State rules and regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Re: Navajo 14-20-603-1312

Gentlemen:

Receipt is acknowledged of your "Notice of Intention to Drill" dated October 11, 1956 covering your well No. 1 Harold Begay in NW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 25, T. 25 N., R. 11 W., N. M. P. M., San Juan County, New Mexico, Wildcat pool.

Your proposed work is hereby approved subject to compliance with the provisions of the "Oil and Gas Operating Regulations" revised May 25, 1942, a copy of which will be sent to you on request, and subject to the following conditions:

1. Drilling operations so authorized are subject to the attached sheet for general conditions of approval.
2. Furnish copies of all logs.

Very truly yours,

P. T. McGrath
District Engineer

PLEASE READ BEFORE STARTING OPERATIONS

Attention is called to the following general and special requirements for operators on Federal, Indian and Acquired land oil and gas leases. Suspension of operations may be required by the District Engineer for failure to comply with the Operating Regulations, the conditions of drilling approval, and these requirements.

GENERAL

1. All drilling and producing wells shall be permanently marked in a conspicuous place with the name of operator, lease name, serial number of lease, well number, and location. Necessary precautions must be taken to preserve such signs.
2. Any change of drilling plan or condition of approval must have approval of the District Engineer BEFORE the change is made.
3. Before work is started written approval must be obtained unless other arrangements are made in advance with the District Engineer. After work is completed results must be reported to the U. S. Geological Survey by submitting to the District Engineer complete information including the dates the work was done on Form 9-331a (9-331b-Indian), in triplicate, covering:
 - a. Mudding, cementing, and method and results of testing water shut-off. (Show spud date of well on first report submitted).
 - b. Drill-stem tests or perforating.
 - c. Shooting, acid treatment, deepening or plugging back.
 - d. Casing alterations, packer setting, or repairs of any kind.
 - e. Gas-lift installations.
4. Monthly report of operations in duplicate on form 9-329 (9-329A-Indian) must be submitted promptly each month to U. S. Geological Survey, Box 6721, Roswell, New Mexico, beginning with spudding of the first well on a lease and continuing until abandonment of all drilling and producing operations is approved.
5. Log, in quadruplicate, on form 9-330, must be submitted to the District Engineer within 15 days of completion, abandonment, or suspension unless operator is otherwise instructed by the District Engineer. The log should include a complete driller's log, descriptions of all core, results of all drill stem tests, formation tops identified, and all other well information not previously reported. Duplicate copies of all electrical logs, sample logs, drilling time logs, temperature, deviation, and other well surveys also must be filed.
6. All wells and lease premises shall be maintained in a workmanlike manner with due regard to safety, conservation, and appearance.
7. Approval of a notice of intention to drill or abandon a well will be rescinded without further notice if drilling or abandonment is not started within 90 days.
