114W
(Meridian)

Dist. 3
(Field)

San Juan County
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the Ground surface above sea level is 6639 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to set a 5/8 O. D. 2 1/2" Surface Casing at approximately 350' using sufficient cement to circulate to the surface. We propose to drill 7 3/4" hole to 3400' to test the Gallup Sand. If commercial production is encountered, we propose to set 5 1/2" 14 1/2" J55 Casing to T. D., and use enough cement to cement to 600' above the casing shoe or 500' above the top producing zone, which ever is higher. We intend to acidize or sand oil fracs during completion if a stimulant is necessary.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

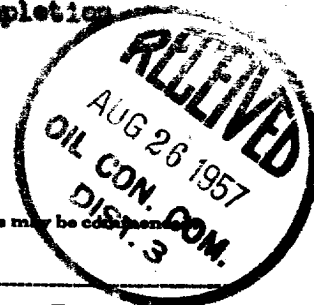

Company Sunray Mid-Continent Oil Company

Address 411 West Main

Farmington, New Mexico

By J. L. Perry

Title Foreman

NEW MEXICO OIL CONSERVATION COMMISSION

Well Location and Acreage Dedication Plat

Section A.

Date August 22, 1957

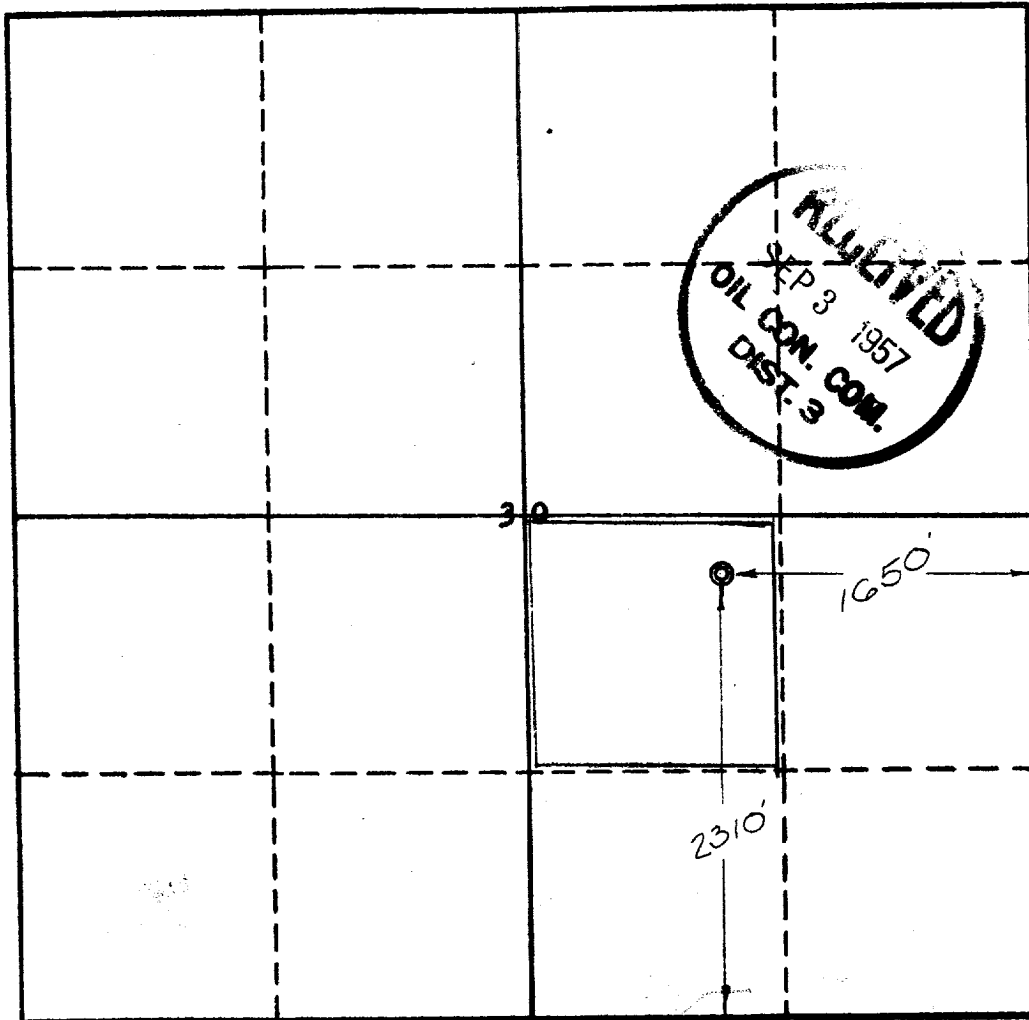

Operator Sunray Mid-Continent Oil Company Lease Nah-Glee-Des-Pah Eaton
Well No. 2 Unit Letter Section 30 Township 25 North Range 10 West NMPM
Located 2310 Feet From South Line, 1650 Feet From East Line
