Well No. **2** is located **660** ft. from **N** line and **1890** ft. from **E** line of sec. **30**
NW NE **Sec. 30** **25 N** **10 W** **N.H.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Bisti Gallup **San Juan** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~surface~~ above sea level is **6577.6** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location with rotary tools to an approximate total depth of 5300' to test the Gallup Formation. 200' of 8-5/8" O.D. casing will be set and cemented to surface. Should the well prove productive, a 1-1/2" oil string will be used.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
