The elevation of the derrick floor above sea level is - - - ft. (Will furnish later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Gulf Designation: Tah nez bah Heirs-Navajo No. 1

It is proposed to drill a development well to test the Gallup formation to an approximate total depth of 5000'. 8-5/8" OD surface casing will be set at 300' and cemented to surface. If commercial production is encountered, 5-1/2" OD production casing will be set at 5000'. All possible producing formations will be adequately cored and/or tested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
