13. Describe Proposed or Completed Operations (Clearly state all pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*
Central Resources, Inc. intends to plug the well in accordance with regulations. Production equipment will be removed and the well will be plugged as specified. **Perforate and squeeze will be used unless casing can be recovered over the specified interval or there is evidence cement is in place behind the casing.**

Proposed procedure:

- Notify the Farmington BLM office at 505-599-8907 24 hours prior to commencement of plugging operations.
- Pull all retrievable downhole production equipment.
- Set a CIBP at 4700' and spot 50' of cement on top.
- Set a 100' cement plug from 1818' to 1918' across Menefee top at 1868'.
- Set a 100' cement plug from 984' to 1084' across the Pictured Cliffs at 1034'.
- Set a 100' cement plug from 574' to 674' across the Fruitland Coal at 624'.
- Set a 153' cement plug from surface' to 153' across the surface casing shoe at 103'.
- Cut wellhead and install dry hole marker. Clear and remediate location.

Please take into account the number of existing P&A procedures, the number of P&A procedures you have requested and the available equipment and allow Central Resources, Inc. until the end of 2000 to complete this abandonment.

14. I hereby certify that the foregoing is true and correct
