DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to name this well CBU OI No.12 for inclusion as a gas injection well in the Central Bisti Lower Gallup Sand Unit. This well was formerly known as the Shell-Phillips No.4 Government No.32-9. Approval for conversion to gas injection was granted by New Mexico Oil Conservation Commission Order R 1414.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
