## 17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Production of mud indicates a casing leak in this well. We propose to set a retrievable bridge plug at approximately 4500'. We will run a casing corrosion log to determine the area of corrosion. A squeeze retainer will be run and the leak located. Cement will be pumped into the leak to cover the area of bad casing. The cement in the pipe will be drilled out and the casing tested to 1500 psi for 30 minutes. The bridge plug will be pulled and the well returned to producing.
