H. M. Federal "C"

Well No. 10 is located 660 ft. from [N] line and 1980 ft. from [E] line of sec. 6

SW/4 SE/4 25N 12W NMPL
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Bisti-Gallup
(Field)

San Juan

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 6220 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The 5 1/2" casing was perforated with 6 "F" Gun bullets per ft. 4883 to 4892 & 4898 to 4905, Schlumberger measurements. The perforations were fractured with 15,000 gals lease oil and 15,000 sand. A cast iron bridge plug was set at 4838' and the zone 4816' to 4828' was perforated with Lane Wells "B" gun. The zone was fractured with 15,000 gals lease crude and 15,000 sand. The bridge plug was then drilled out and the well cleaned out to 4950'. 2 3/8" NUE tubing was run and the well put on production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
