Kelly State No. 10, Lease No. E-6597

This well was drilled in 1956. 5-1/2" production casing was set at 5010'. During completion the well produced considerable amount of water. The well was plugged and abandoned on August 16, 1956. None of the 5-1/2" casing was pulled.

During the recompletion the proposed program is:

1. Drill out cement plug in casing.
2. Make fluid check of perforations 4880'-4896'.
3. Re-perforate 4880'-4896' and flush with oil, if necessary.
4. Put well on production if zone perforated produces oil in sufficient quantities.
