E. L. Fundlingsland  
1741 First National Bank Building  
Denver, Colorado 80202

Gentlemen:

On April 16, 1976, we approved the temporary abandonment of your #D-2 Sunnical-Federal well, located in sec. 19, T. 26 N., R. 7 W., Rio Arriba County, New Mexico, on Federal lease NM 011639, for a period of one year.

Please submit Sundry Notices (copies enclosed) advising of your plans for this well. A request to continue temporary abandonment should include justification for such status.

Please carry all temporary abandoned and shut-in wells on your monthly production report, form 9-329, until plugged.

Sincerely yours,

(Orig. Sgd.) J. W. LONG

Jerry W. Long  
District Engineer

Enclosures: Sundry Notice package

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The next step is to gather relevant information and data. This can be done through research, interviews, or other methods.

3. Once the information is gathered, it is important to analyze it and identify the key factors that influence the outcome. This step often involves critical thinking and the ability to synthesize information.

4. After analysis, the next step is to develop a plan or strategy to address the problem. This plan should be based on the information gathered and the analysis performed. It should also be flexible enough to adapt to changes in the situation.

5. The final step is to implement the plan and monitor the results. This involves putting the plan into action and tracking progress to ensure that the goal is being met.

6. Once the plan is implemented, it is important to evaluate the results and determine if the goal has been achieved. If not, adjustments may need to be made to the plan.

7. The final step is to document the process and results for future reference.
