

November 19, 1956

Mr. A. L. Porter, Jr., Secretary
New Mexico Oil Conservation Commission
Mabry Hall, Capitol Building
Santa Fe, New Mexico

Dear Mr. Porter:

Pacific Northwest Pipeline Corporation requests that the New Mexico Oil Conservation Commission grant them permission to dually complete the Unit 27-5, Well No. 18-36, under the provisions of Order #R-316, Rule No. 112-A.

Unit 27-5, Well No. 18-36, is located 2111' PSL, 1624' FWL, Sec. 36, T 27N, R 5W, Rio Arriba County, New Mexico. The attached plat shows the ownership in the area and the location of the well. The W/2 of Sec. 36, containing 320 acres, is dedicated to the drilling block in accordance with the Blanco Mesa Verde rules; and the SW/4 of Sec. 36, containing 160 acres, is dedicated to the Pictured Cliffs drilling block, which is classified as a wildcat.

Attached for your information is a diagrammatic sketch of the proposed dual completion, with information concerning formations involved, perforations and location of packer and tubing equipment. We also attach a Return Receipt of Registered Mail, notifying the offset operators that Unit 27-5, Well No. 18-36 has been dually completed.

The 3-hour Calculated Absolute Open Flow on the Mesa Verde formation was 3,235 mcf, and on the Pictured Cliffs formation was 23,258 mcf. The Packer Leakage Test was witnessed by Mr. Emory Arnold, and the necessary data concerning this test has been filed with the Commission.

If additional information is needed on this well before a final order approving the dual completion can be issued, please notify us.

Respectfully submitted,

T. A. Dugan,
District Engineer
