17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The subject well had quit producing and a unit was moved in to swab the well in on May 22, 1974. When drilling mud was recovered, it was determined that the well had experienced a casing failure. As a result, the well was cleaned out to 3110', and a Baker Model 0-28 RC hydrogrip packer was run on 1 1/4" IJ tubing and set 3039-44 with a 1" tail joint to 3074'. A packer fluid was placed in the 1 1/4"-2 7/8" annulus. Operation was completed May 25, 1974.

18. I hereby certify that the foregoing is true and correct
