RECEIVED  
DEC - 3 1998  
OIL CON. DIV.  
DIST. 3

Dear Ms. Bradfield:

Reference is made to your application dated August 31, 1998, requesting authorization to down hole commingle gas and associated liquid hydrocarbons from the Mesaverde and Dakota formations in the above referenced well. After reviewing the production histories of the Mesaverde and Dakota Formations, we have determined that these intervals have similar decline rates, pressures, and fluid characteristics. As such, we hereby approve your request for down hole commingling and allocation of production. The fixed allocation factors for the Mesaverde and Dakota production are outlined below:

<u>Formation</u>	<u>Gas</u>	<u>Oil</u>
Dakota	37.96%	25.06%
Mesaverde	62.04%	74.94%

Commingled production from each zone must be reported in accordance with these established allocation factors. The effective date of commingling will be the date commingling first occurs.

If you have any questions regarding the above, contact Jim Lovato at (505) 599-6367.

Sincerely,  
**/S/ Duane W. Spencer**
