COMMENTS:

This Sunday does

note the Gallup being unproductive  
and I will try to find copies  
on the NW completion. Thanks.

☐ Abandonment☐ Resumption☐ Plugging Seal☐ Casing Repair☐ Alleviating Casing☐ Other☒ Change of Plans☐ New Construction☐ Non-Routine Pumping☐ Water Shut-Off☐ Conversion to Injection☐ Dispose Water

(Other: Report results of multiple completions on Well Completion or Resumption Report and Log (Form 3160-5))

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Rincon Unit No. 303 was originally permitted and drilled as a Basin Dakota/Largo Gallup well. The well was spudded 6-13-94 and TD'd @ 7740' 7-2-94. The well was logged and 5 1/2" production casing was run and cemented. The Burro Canyon was perforated, fracture stimulated, and tested. The Burro Canyon proved to be non-productive during testing and was squeezed. The Dakota Graneros was perforated, fracture stimulated and tested. The well was completed as a Dakota producer.

Logs indicate the Gallup to be non-productive, and Unocal wishes to perforate, fracture stimulate and test the well in the Mesaverde interval, and if productive, complete the well as a Dakota/Mesaverde producer.

Application has been made to the State of New Mexico Oil Conservation Division for an unorthodox Mesaverde location for this well.

14. I hereby certify that the foregoing is true and correct
