13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Rincon Unit Well No. 186M was originally permitted and drilled as a Basin Dakota/Largo Gallup well in June 1994. The well was completed in the Dakota Formation in July 1994, but due to the poor quality of the reservoir (indicated by logs) was not completed in the Gallup Formation.

Unocal proposes to perforate, stimulate and test the well in the Mesaverde interval and if productive, complete and commingle the well as a Dakota/Mesaverde producer.

Attached is a new well location and acreage dedication plat for Well 186M.
