OIL CON. DIV.
DIST. 3

*Rincon Unit Well No. 186M
Unit L, Section 33,*

and;

*Rincon Unit Well No. 187E
Unit P, Section 35;*

both in Township 27 North, Range 7 West, NMPM, Rio Arriba County, New Mexico.

*Commingling of Basin Dakota (Prorated Gas 71559) and
Blanco Mesaverde (Gas 72319) Pools.*

Dear Mr. Liggett:

Reference is made to your recent application for an exception to Rule 303-A of the Division Rules and Regulations to permit the subject well to commingle production from both pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the two zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303-C-4., total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

In accordance with the provisions of Rule 303-C, the supervisor of the Aztec District Office of the Oil Conservation division shall determine the proper allocation of production from the subject well following its completion.
