13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BLA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

As per a conversation between Tom Schaefer (Conoco drilling engineer) and Charlie Perrin and Jim Lovato on Thursday 18th of July, changes were made to the 128G.

Due to high torque and drag associated with drilling a directional hole on air we were not able to drill any deeper without becoming stuck. We therefore loaded the hole with mud and drilled to planned TVD of 7735' on mud. We ran casing as per plan and cemented in two stages with a DV Tool. The tool was set at 4983' MD/ 4653' TVD or 150' above the Cliffhouse formation. The float collar was set at 7890' and the float shoe was at 8070'. Both stages were pumped with full returns, the tool functioned properly, cement was circulated to surface off of the top of the tool, and the plug was bumped on the second stage.

14. I hereby certify that the foregoing is true and correct. <b>Electronic Submission #13108 verified by the BLM Well Information System For CONOCO INC, sent to the Farmington Committed to AFMSS for processing by Adrienne Garcia on 07/29/2002 (02AXG0294SE)</b>
