Re: El Paso Natural Gas No. 1 HaSosa,
31-26-8, Ballard Pictured Cliffs.

Dear Mr. Arnold:

With reference to your letter of March 19, 1958, the records of El Paso Natural Gas Company's Measurement Department show that this well has not been first delivered.

This well when completed had an initial potential of 600 MCF/D. As yet we have been unable to get any production from this well.

Yours very truly,

H. L. Kendrick
Gas Engineer
