(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is our intention to temporarily abandon the Dakota formation until we have had an opportunity to evaluate the Gallup formation in our Con Hale 2-E.

In order to place a well in an acceptable condition for temporary abandonment, it is necessary to place either a bridge plug or cement plug no more than 50 feet above the upper most perforations and close the well in at the surface. If a bridge plug is used, it must be capped with cement. The cement cap must be the greater of 35 feet or 5 sacks of cement if placed by dump bailer or, 25 sacks if spotted by tubing. If a cement plug is used it must be the greater of 100 feet or 25 sacks of cement.

This Approval Or Temporary Abandonment Expires 11-20-86

18. I hereby certify that the foregoing is true and correct
