*will file*

Dear Sir:

Enclosed are original and two copies of Northwest New Mexico  
Packer Leakage Test and original and four copies of Form C-110  
for our USA Walter O. Berger #4, located in Unit C of Section  
22, T26N, R11W, San Juan County, New Mexico.

This is a dually completed Gallup (oil) Dakota (gas-condensate)  
well with both zones presently connected to a gas pipeline outlet.

Because we feel the information submitted indicates no communication  
between zones, and to run Flow Test #2 and vent the gas to the  
atmosphere would necessitate wasting a substantial amount of gas,  
we request approval of Form C-110 to allow us to sell the gas while  
conducting Flow Test #2.

We would greatly appreciate your early consideration of this request.

Very truly yours,

TENNESSEE GAS TRANSMISSION COMPANY
