*Rocanville Corporation
1125 Mercantile Securities Building
Dallas 1, Texas*

Attn: Mr. J. B. Avant

Dear Sir:

You have inquired as to the reason your #1 Riddle Trust well located in Section 18-26N-13W did not receive an allowable on the October proration schedule.

The well was left off the schedule for the reason that the no-flare exception had expired; however on October 21, an extension to the NFO 474 was received in this office, effective October 20, 1961 for extension to October 20, 1962, the exception date under this order. We have therefore issued a supplement to the oil proration schedule effective October 20, 1961 granting this well an allowable of 39 barrels per day. This is the amount of oil that it produced on the last Gas-Oil Ratio test which was filed with this office.

If you have any further questions regarding the above matter, please contact us.

Yours very truly

*Emery C. Arnold

October 17, 1961

International Petroleum
1127 International Petroleum
Dallas 1, Texas

Attn: Mr. J. H. Hunt

Dear Sir:

You have advised us on the record your 1127 International Petroleum well located in Section 18-20N-13W has been scheduled for the October production schedule.

The well was left off the schedule for the reason that the no-flow exception had expired; however on October 2, an extension to the WFO was received in the office, effective October 20, 1961 for extension to October 20, 1962, and exception date under this order. We have therefore issued a supplement to the oil production schedule effective October 20, 1961, noting this well an allowance of 39 barrels per day. This is the amount of oil that it produced on the last gas-oil ratio test which was filed with this office.

If you have any further questions regarding the above matter, please contact us.

Yours very truly,

Henry C. Arnold
Director, District #3
