Gentlemen:

We have copies of revised form C-103 relating to your proposed plugging plan for your Riddle Trust #1 well located in the Southwest quarter of Section 18, Township 26 North, Range 13 West.

We note that you have specified optional plans dependent upon your success in attempting to pull your 5½ inch casing. The plan you have outlined in case the casing is pulled is agreeable. However in the event the casing is left in the hole we will require that a 50 foot cement plug be placed both inside and outside the casing string at a depth between 1645 feet which is the top of the Pictured Cliffs Sandstone and 500 feet, so that possible future contamination of surface water cannot occur.

We are amending your notice to reflect this change.

Yours very truly,

Emery C. Arnold

Gentlemen:

We have copies of revised form O-103 relating to your proposed plugging plan for your Rio Grande Trust No. 1 located in the Southwest quarter of Section 16, Township 26 North, Range 13 West.

We note that you have specified optional plan depend on upon your success in attempting to pull your 2 1/2 inch casing. The plan you have outlined in case the casing is pulled is impossible. However in the event the casing is left in the hole we will require that a 20 foot cement plug be placed both inside and outside the casing string at a depth between 1500 feet which is the top of the Pictured Cliffs Sandstone and 500 feet, so that possible future contamination of surface water cannot occur.

We are amending your notice to reflect this change.

Yours very truly,

Emery C. Arnold
