Farlington, New Mexico, October 13, 1952

Well No. 19 is located 990 ft. from N line and 1630 ft. from E line of sec. 5
NE/4 of Section 5 T-26-N R-10-W NM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Fieldcat San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft. (to be reported later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 2200 feet. Rotary tools will be used to total depth. Casing will be set on top of pay. Fractured Cliffs will be drilled with gas and cleaned out with gas after shot with ball.

The following casing program is proposed:

Size	Depth	Cement	Remarks
8-5/8"	100	75	175% of calculated amount to circulate.
5-1/2"	2100	75	100% of calculated amount to fill 600' above shoe.

Copies of location plate are attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
