The above well was shut-in on 5-7-75 due to economics. Latest production test on 1-25-75 yielded 5 BO, 196 BW, and 6 MCF in 24 hours.

This request is being filed to obtain approval to temporarily abandon the well to allow time to evaluate its use as a second water disposal well or to initiate a workover,

Because accepted cementing practices were used upon completion, the casing string should be in good condition, preventing damage to the Barker Creek formation, migration of hydrocarbons or water, contamination of fresh water or other natural resources, or the leakage of any substance at the surface.
