In Re: Tamanaco Oil Corp.  
#27-B Pound Ranch

Gentlemen:

Today I see that your man tagged the captioned well yesterday. Apparantly he thought I had drilled the well, and had not filed a form 103.

This well was only drilled to about 250', 7" cemented to that depth, then an attempt made to drill with air that failed. I am now awaiting cable tools to drill the well.

I can think of no other reason for his tagging the well. If there is a reason please call me collect at Park View, Juniper 8-2376. If I am permitted to remove the tag also please call me.

Yours very truly,

H. K. Riddle

P. S. I mentioned to you today (Mr. Kendrick ) that I was changang the plan and would drill with cable tools. He agreed that no notice of this change would be necessary.
