Detailed account of work done, nature and quantity of materials used, and results obtained.  <b>250' of 7" casing was set for surface pipe, cement circulated to surface. Water was encountered at 300' to make air drilling impractical and hole was abandoned. Water stands almost to the surface. The landowner, or this Company, may want to pump and use water from this well this summer. If and when we do we will file proper affidavit of conversion to water well. Until this is decided, we would like to leave the well in suspension.</b> <b>A four foot nipple is screwed into the casing, making it 4' above the ground, and a plate welded over it - completely shutting the well in.</b>
