Due to non-commercial production it is intended to plug and abandon this well in the following manner:

2. Spot a 60 sack cement plug from 3950' to cover 30' above top at 3650'.
3. Determine 5 1/2" casing free point and cut casing.
4. Spot a 15 sack cement plug across cut-off.
5. Spot a 10 sack cement plug in surface w/ 4" x 4" dry hole under.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
