DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We would like to defer permanent abandonment until completing the geological and engineering studies currently in progress.

Florilla 4-26-1 is safely cased and controlled, and is periodically checked by field personnel. No hazard will be created by deferring abandonment.

We request approval to have the well put on temporarily abandoned status.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
