Farmington, New Mexico September 8, 19 53

Well No. 1 is located 1730 ft. from N line and 700 ft. from E line of sec. 32
NE 1/4 of Section 32 T-38-N R-4-W NMP
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wilcox Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7334 ft. (Ungraded ground)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 6800 feet with rotary tools. Drill stem tests will be run over indicated pay sections. Casing will be set on top of the Mesaverde formation. If stimulation is necessary the pay will be shot open with GEC and clean out will be with cable tools.

The following casing program is proposed:

Size	Depth	Cement	Remarks:
10-3/4"	500'	400	200% of theoretical amount to circulate
7"	6100'	300	

Copies of location plats are attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
