I. Site Specific Stipulations

The surface use plan of the Application for Permit to Drill should be followed as outlined. The plan covers all the mitigating measures discussed at the onsite. These additional Conditions of Approval must also be included.

A. The dry hole marker on the location will be removed and handled according to NM OCD requirements.

B. If the well is productive, ROW's will be required for the access road and pipeline. A pipeline ROW may require additional clearances and NEPA documentation. The company is required to contact the BLM prior to upgrading the access road or constructing a well tie pipeline.

C. Use the following seed mix in reseeding operations. Rates shown are for pure live seed. All seed used in reclamation projects shall be certified noxious weed free prior to use.
