13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

It is proposed to change this well to long term shut-in status.  
The well has been evaluated and found to have recompletion potential.  
However, at current natural gas prices, the recompletion cannot be performed economically.

It is requested this well be approved for long term shut-in status for the following reasons:

1. The well is currently unable to buck line pressure.
2. The well is unable to produce in paying quantities under current market conditions.
3. The well has additional reserves and has the potential to produce again if market conditions and/or line pressures change, or if a recompletion can be economically performed.

THIS APPROVAL EXPIRES OCT 01 1992

14. I hereby certify that the foregoing is true and correct
