RE: San Juan 28-7 Unit 8A, I 18-28N-07W, API 30-039-22209

Mr. Donald Blair:

The 2000 Packer Leakage Test on the above referenced well does not provide the required information. It is necessary to show a crossover of pressures for the separate zones. This is accomplished by producing the higher-pressure zone until the pressure is below the lower-pressure zone. If the test can not be accomplished in this manner, follow the instructions on the back of the form for a complete test. Conduct the test and submit the required information within thirty days of receiving this letter.

Feel free to call me at 334-6178, ext. 16, if I can be of any help.

Sincerely,

Charlie T. Perrin

Charlie T. Perrin
