(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Amoco proposes the following action be approved for the subject well:
The Tertiary Nacimiento horizon was completed on September 22, 1982 using 4 JSPF in the interval 2818-2808'. After several days of testing the well proved to be non-productive. Amoco would like to look into the feasibility of using this well as a water disposal well. There is going to be a compression facility installed in Valencia Canyon Unit. After the compressor becomes operational, water disposal may become a problem.
Amoco would like approval to shut in the well and leave it in a shut in status until Dec. 31, 1982. At that time the well will either be abandoned or converted to a water disposal well. This is pending the compression facility installation and approval from the State of New Mexico for using this well for water disposal. Verbal approval was recieved on 9-22-82 from Earl Beacher to Alan Montoya.
