(County or Subdivision)**New Mexico**
(State or Territory)The elevation of the derrick floor above sea level is **6185** ft.**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On April 25, 1956, this well was spudded and 9-5/8" casing landed at 525 feet, cemented with 260 sacks. After waiting on cement for 24 hours, casing and water shut off were tested with 600 pounds for 30 minutes with no drop in pressure. Drilling operations were resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
