Re: Proration Unit for McAdams
#4, 34-27-10W, Basin-
Dakota Gas Pool

Gentlemen:

Reference is made to your letter of April 18, 1962,
pertaining to the above-captioned well.

We are investigating your acreage situation pertain-
ing to the McAdams No. 4 and will issue a supplement in
the near future for any adjustments that may be necessary.

Very truly yours,

ELVIS A. UTZ
Gas Engineer

Re: McAdams #4, W/2 Sec. 24-27N-10W
San Juan County, New Mexico

Gentlemen:

Referring to the above captioned proration unit, on January 6, 1961, we prepared an "Acreage Dedication Plat" which was received in your office on January 11, 1961, allocating the West half (W/2) of Section 34, Township 27 North, Range 10 West, San Juan County, New Mexico, to our McAdams #4 well in the Tertiary formation.

It was called to my attention that the allowable for this well has been based on a 160 acreage dedication; consequently, we have been receiving only 50% of our allowable.

Please correct this error and arrange for us to make up our past allowables. I would appreciate hearing from you in this regard immediately.

Yours very truly

A. L. Brown

Attn: Mr. A. M. Brown

Dear Mr. Brown:

Reference is made to your letter of April 18, 1962 to Mr. Elvis Utz regarding proper acreage assignment for your McAdams #4 well in Section 34-27N-10W, Basin Dakota Pool.

We find that you are correct and that a 320-acre plat was submitted for this well on January 11, 1961. This was prior to the inception of prorationing in the Basin Dakota Pool; therefore the well should have had full acreage from February 1, 1961 which was the date of the beginning of Dakota prorationing.

As we were ever notified of the error and failed to notice it in this office the correction was never made. We regret that this has happened and are correcting the allowable on this well to February 1, 1961 with a gas supplement as of this date.

Yours very truly

*Emery C. Arnold
Supervisor, District #2*
