

NEW MEXICO OIL CONSERVATION COMMISSION  
MISCELLANEOUS REPORTS ON WELLS  
(Submit to appropriate District Office as per Commission Rule 1106)

COMPANY El Paso Natural Gas Company, Box 997, Farmington, New Mexico  
(Address)

LEASE Guecia State WELL NO. 2 UNIT D S 32 T 27N R 8W  
DATE WORK PERFORMED 12-13-56 POOL So. Blanco P.C. Ext.

This is a Report of: (Check appropriate block) ☐ Results of Test of Casing Shut-off  
☐ Beginning Drilling Operations ☐ Remedial Work  
☐ Plugging ☒ Other Water Fracture

Detailed account of work done, nature and quantity of materials used and results obtained.

Total Depth 2295'. Plug back Total Depth 2240'.  
Water fractured Pictured Cliffs through perforated intervals 2200-2205, 2219-2227  
w/4 shots per foot, with 28,000 gallons water and 25,000# sand. Breakdown pressure  
2700#, maximum pressure 2700#, average treating pressure 1800#. Injection rate  
52 BPM. Flush 4000 gallons.

OIL CONSERVATION COMMISSION

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 200 million to 400 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

As a result of the above, the following is proposed:

1. *Journal of the American Medical Association*, 1997; 277: 1039-1043.

2. The second part of the paper is devoted to the study of the asymptotic behavior of the solutions of the problem (1.1)–(1.3) as  $\epsilon \rightarrow 0$ . In this case, the asymptotic expansion of the solution is obtained in the form of a series in powers of  $\epsilon$ . The leading term of this expansion is the solution of the problem (1.1)–(1.3) with  $\epsilon = 0$ . The higher-order terms of the expansion are determined by the solutions of the problems (1.1)–(1.3) with  $\epsilon = 0$  and the boundary conditions (1.4)–(1.5).
