(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

May 24, 1957, 19

U. S. Federal "J"  
Well No. 1 is located 640 ft. from N line and 640 ft. from E line of sec. 35

N/E of N/E 27S 13E 187N  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Frank San Juan County New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the Ground ~~derrick floor~~ above sea level is 5907 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to a sufficient depth to test the Gallup Sand. We propose to set 350' of 3 5/8" surface casing and cement to surface; to drill through the Gallup Sand section to a depth of approximately 5200' and if, upon evaluation of open hole information and electrical surveys, there is indication of commercial production, to set 5 1/2" casing through same.

We propose to gun perforate the casing and, if necessary, to fracture during completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
