The elevation of the derrick floor above sea level is 6452 ft.

DETAILS OF WORK

¹State names, if used, expected depth of labor, tree counts, stone sizes, weights, and lengths of proposed (simultaneous) mudding jobs, comments on jobs, and all other important proposed work.

It is intended to plug and abandon this well in the following manner:

1. Recover casing head.
2. Weld a 1/2" plate on top of surface pipe w/a 4" x 4' dry hole marker welded to plate.

Note: This well was drilled 1-7-56 to a total depth of 100' ± 8 5/8" casing was cemented from top to bottom w/cement left in bottom of casing. The casing is full of water to the surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations can be commenced.
