Attn: Mr. W. G. Rabe

Dear Mr. Rabe:

We have received your inquiry about oil production from the R & G Drilling Company #41 Hammond well, which is located in the Blanco Mesaverde Pool, San Juan County, New Mexico. I have referred to the New Mexico Oil and Gas Engineering Committee annual report, which is compiled from Commission records and find that the 1961 production was 148 barrels and the 1961 production was 248 barrels. Their records indicate that the well has produced no oil in 1962.

In checking their 1959 report I have discovered what I believe to be an error, as production in excess of 8000 barrels was indicated for a one-month period, with no production shown for the balance of the year. I am, therefore, forwarding your request to our Santa Fe Office in order that they may determine from the Operator's production report forms on file what the correct production was in 1959.

If we can be of any further help in the matter, please contact us.

Yours very truly

*Emery C. Arnold

AIR MAIL

Mr. E. C. Arnold, Supervisor
District No. 3
Oil Conservation Department
Aztec, New Mexico

Dear Mr. Arnold:

I own a working interest in a gas and oil well known as R & G Drilling Co. Hammond No. 41 in the San Juan Basin of New Mexico. The owner's number designation for gas production is listed by El Paso Natural Gas Company as 70978; SLC number meter-lease 72193-54969; code 114.

I have been receiving monthly gas payments from El Paso but have never received any payment for residual oil production since the well came in back in August of 1958.

I would greatly appreciate it if you could inform me as to the amount of oil produced from this Hammond No. 41 well to date so that I can get an accounting from the operator, R & G Drilling Co., Mr. William Russell, Manager.

Thanking you in advance for your kindness in sending me this information and with kind regards, I remain

Very truly yours,

W. G. Rabe
