Re: Supplement NW 4694 and NW 4721

Dear Al:

Reference is made to your letter of April 30, 1959.

The Egan-Hammond No. 5 - G 25-27-8 was a non-marginal well prior to 2-26-59. Since this was a workover, its non-marginal classification is effective as of the date of connection which was 2-26-59, therefore, NW 4694 is correct. The 7166 MCF which was to be transferred from Great Lakes No. 2 Hammond to the Egan No. 7 was inadvertently omitted from NW 4721 due to the change in operators name. A supplement will be issued in the next few days giving the Egan No. 7 the benefit of the unit status of 7166 MCF. This will be issued in the form of additional allowable.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Elvis".
