(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

February 15, 1952

Well No. 2 is located 990 ft. from N line and 990 ft. from E line of sec. 27

NW 1/4 Sec. 27 (1/4 Sec. and Sec. No.) 27 N. (Twp.) 11 E. (Range) N. M. P. M. (Meridian)
So. Kutz Canyon (Field) San Juan (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 6360 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We request permission to test the Fruitland formation by perforating from 1672 to 1696 feet. We believe that by perforating this zone we can make a Commercial well out of this hole, as we have a known producer of 100MCV per day in the Pictured Cliffs, which is not enough to be commercial. We ran 150 sacks of Cement on this string of pipe to protect this zone from water evasion from above and below. Temp. Survey shows cement at 1520'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
