The elevation of the derrick floor above sea level is 6105 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The 5 1/2" casing was perforated 5265' to 5300' w/4 holes per foot. The zone was tested and found to be dry. The perforations were squeezed to 2000# with 50 sacks. The 5 1/2" casing was shot off at 4400' and the casing worked to free but found free point at 2650'. Spotted 50 sacks cement at 4400' and shot off casing at 2625'. Spotted 50 sacks in top of casing, to 2400' pulled up and spotted 40 sacks plug 1400' to 1270' and 40 sacks plug 600' to 480' and 20 sack plug 400' - 395'. Cemented 22" in top of 8 5/8" casing with 1/2" marker 5' above ground level. Well abandoned.

I understand that this plan of work must receive approval in writing by the Geological Survey before operation may be commenced.
