Well No. 1 is located 660 ft. from N line and 1980 ft. from W line of sec. 22

SW/4 of SE/4 27-N 13-W NWPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6105 ft.

DETAILS OF WORK

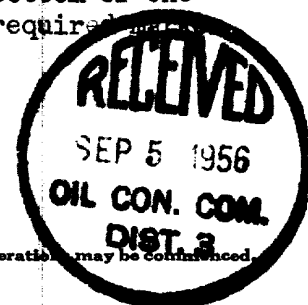

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is Sunray Mid-Continents intention to plug and abandon the subjects well. The "pay" zone will be squeezed and the 5 1/2" casing pulled from the well if found to be free. A cement plug will be placed in the top of the casing left in the hole and plugs will be placed so as to isolate other formations as directed by the supervisor of the USGS. A plug will be placed in the bottom of the surface casing and cement will be placed in the top with the required cement. We intend to proceed with this operation as soon as approved.
