Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On September 30, 1983 we commenced work to repair a casing failure. The operations were as follows; we pulled the 1" tubing and ran a string of 1 1/2" tubing with a cement retainer on the bottom of the tubing. Retainer was set at 1900', rigged up to swab, made approximately 40 runs. Fluid level remained between 1600' and 1800', with no gas show. We propose to try liquid soap and swab again.
