Farmington, New Mexico, July 13, 1951

Well No. B-2 is located 1650 ft. from [N] line and 1650 ft. from [E] line of sec. 24
SW/4 of Section 24 T-27-N R-10-N NMPM
 (Field) (County or Subdivision) (State or Territory)
Fulcher-Ruiz (Township) San Juan (Range) New Mexico (Meridian)

The elevation of the derrick floor above sea level is 6232 ft. (G.L.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 2100 feet to test the Pictured Cliffs formation. Rotary tools will be used from surface to total depth. Casing will be set on top of pay. Pay will be shot with BNG and hole cleaned out with cable tools.

The following casing program is proposed:

| Size | Depth | Cement | Remarks |
|---------|-------|----------|--|
| 10 3/4" | 100' | 85 sacks | 175% of calculated amount to circulate. |
| 5 1/2" | 1975' | 75 sacks | 100% of calculated amount to fill 600' above shoe. |

Copies of location plats are attached.

A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
