Farmington, New Mexico, June 19, 19 51

Well No. C-2 is located 1700 ft. from XXX line and 1650 ft. from XXX line of sec. 23
SW/4 of Section 23 T-27-N R-10-W NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Fulcher-Kutz (Extension) San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6300 ft. (Est.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On June 12, 1951, at 4:00 P.M., 5-1/2" casing was set at 2122 feet with 75 sacks cement. Rotary rig was moved off of location and cable tool rig rigged up for drilling cement plug and pay.

On June 18, 1951, hole was bailed dry and remained dry for two hours. Thirty feet of solid cement was then drilled in bottom of pipe and hole again bailed dry. Hole remained dry for two hours which was considered a satisfactory water shut-off test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
